Alport Syndrome: Genetic Testing is Key

www.alportsyndrome.org

ALPORT SYNDROME DIAGNOSIS UNLOCKS:

- Disease management recommendations
- Identification of at-risk family members
- Research and clinical trial options
- Educational and connection opportunities

ALPORT SYNDROME FACTS:

- Affects all genders, ages, and ethnicities
- Commonly misdiagnosed as FSGS, IgAN, TBM, or other diseases
- Labeling females as “carriers” is outdated thinking
